

RESEARCH INTERESTS	Trustworthy and Robust ML, Uncertainty Quantification, Data-Constrained ML ML for Safety and Healthcare, Explainable AI
EDUCATION	<p><b>University of Michigan</b>, Ann Arbor, MI M.S. in Computer Science and Engineering May 2024 (Expected) GPA: 4.00/4.00</p> <p><b>PES University</b>, Bengaluru, India B.Tech in Computer Science and Engineering   Specialization: Data Science May 2021 GPA: 9.43/10.00</p>
PUBLICATIONS	<p><b>A. Tambwekar</b>, A. Maiya, S. Dhavala and S. Saha, <i>Estimation and Applications of Quantiles in Deep Binary Classification</i>, IEEE Transactions on Artificial Intelligence <a href="#">[Link]</a> (Journal)</p> <p><b>A. Tambwekar</b>, K. Agrawal, A. Majee and A. Subramanian, <i>Few-Shot Batch Incremental Road Object Detection via Detector Fusion</i>, Proceedings of The IEEE/CVF International Conference on Computer Vision (ICCV) Workshops 2021 <a href="#">[Link]</a> (Oral)</p> <p>M. Kashyap*, <b>A. Tambwekar*</b>, K. Manohara, and S. Natarajan, <i>Speech Denoising without Clean Data : A Noise2Noise Approach</i>, Proceedings of Interspeech 2021 <a href="#">[Link]</a> (Oral - Joint First Author)</p>
RESEARCH EXPERIENCE	<p><b>University of Michigan Transportation Research Institute (UMTRI)</b>, Ann Arbor, MI <i>Research Assistant, Biosciences Department</i> Jan 2023 - Present Supervisors: <a href="#">Dr. Wenbo Sun</a>, <a href="#">Dr. Arpan Kusari</a> and <a href="#">Dr. Byoung-Keon Daniel Park</a> Researching techniques for estimating the posture of vehicle occupants using LIDAR and IR data, without any ground truth annotations.</p> <p><b>Intel India</b>, Bengaluru, India <i>Deep Learning Research Intern, VSG Group</i> Jan 2021 - May 2021 Supervisor: <a href="#">Dr. Anbumani Subramanian</a> Developed a new model for few-shot object detection catered towards road-objects that obtained SOTA performance on the India Driving Dataset (<a href="#">ICCVW Paper</a>).</p>
WORK EXPERIENCE	<p><b>GPTfu</b>, Mountain View, CA <i>Engineering Intern</i> May 2023 - Aug 2023 Supervisor: <a href="#">Dr. Vibhu Mittal</a></p> <ul style="list-style-type: none"> <li>Created a custom semantic search engine and chatbot powered by Weaviate and GPT 3.5</li> <li>Integrated multiple generative AI models such as Stable Diffusion, Midjourney, and AI for Bharat into a single API</li> </ul> <p><b>Microsoft</b>, Hyderabad, India <i>Software Engineer</i> Jul 2021 - Aug 2022</p> <ul style="list-style-type: none"> <li>Index Quality Team: Analysed massive datasets (&gt; 700 TB) and created techniques to automate the filtration of unwanted spam and junk pages from Bing's search Index. Reduced false positive detections by 30%, and migrated the entire legacy quality assessment pipeline to Azure as a collection of microservices and Logic Apps.</li> <li>Ranking Service Platform Team: Worked on the development of a thread-safe, shared-memory LPC library that reduced same-node feature computation latency of Bing's ranking service by 50%. Created a C# library to evaluate the consistency of query results.</li> </ul>

	<p><i>Software Engineer Intern</i> <span style="float: right;">May 2020 - July 2020</span></p> <p>Re-engineered the ORP application of the Global Talent Acquisition team into a collection of microservices for easy scaling. Added one-click deployment functionality to allow clients to deploy any of these services on their own Azure subscriptions for complete data and cost control.</p>
TEACHING EXPERIENCE	<p><b>Department of Computer Science and Engineering</b>, University of Michigan, Ann Arbor, MI</p> <p><i>Graduate Student Instructor</i></p> <p>EECS 448: <i>Human-Centered ML</i> (Winter 2023), 73 students</p> <p>EECS 492: <i>Introduction to Artificial Intelligence</i> (Fall 2022), 274 students</p> <p><b>Department of Computer Science and Engineering</b>, PES University, Bengaluru, India</p> <p><i>Student Peer Teacher</i></p> <p>UE17CS302: <i>Introduction to Operating Systems</i> (Fall 2019), 5 students</p>
HONORS & AWARDS	<p><b>2022-23 Outstanding GSI Award, CSE Division</b>, University of Michigan <span style="float: right;">2023</span></p> <p><b>Dr. CNR Rao Merit Scholarship</b>, PES University <span style="float: right;">2017-2021</span></p> <p>40% tuition scholarship awarded to the top 10% of every department. Received the award every semester.</p> <p><b>Intel Student Developer Award</b>, Intel India <span style="float: right;">2019</span></p> <p>Awarded second place in the Intel Student Developer Contest for the project <i>End-to-End Open Domain Question Answering</i>.</p>
PROJECTS	<p><b>Investigating and Improving the Forward-Forward Algorithm</b></p> <p>Group project for EECS 545: Graduate Machine Learning. Investigated the Forward-Forward algorithm and showed that sequentially learning a classifier resulted in better performance while retaining most of the benefits of Forward-Forward. <a href="#">[Poster]</a> <a href="#">[Report]</a> <a href="#">[Code]</a></p> <p><b>Triviabot : An end-to-end open domain question answering voicebot</b></p> <p>A project in collaboration with Intel India. Created an end-to-end open domain question answering voicebot, using Mozilla DeepSpeech, BERT and the Tacotron TTS models, that doubles as a CPU benchmarking tool. <a href="#">[Code]</a></p> <p><b>Automatic collider deployment</b></p> <p>A project in collaboration with Intel India. Developed a tool in Unity for the automatic deployment of colliders on humanoid models for AR and VR applications.</p>
TALKS	<p><b>Estimation and Applications of Quantiles in Deep Binary Classification</b></p> <p>Presented at The International Conference on Advances in Interdisciplinary Statistics and Combinatorics (AISC), October 2021 at UNC Greensboro</p>
SKILLS	<p><b>Programming Languages</b></p> <p>Python, C, C++, C#, JS, PHP</p> <p><b>Machine Learning Libraries</b></p> <p>PyTorch, Tensorflow, Scikit-Learn</p> <p><b>Cloud Development</b></p> <p>Azure (<a href="#">Certified</a>), AWS, Docker</p>
